Profile

I am a Junior Frontend Developer with hands-on experience in HTML, CSS and JavaScript. In recent years, I have been working on creating responsive websites using modern tools and technologies such as JavaScript, PHP, WordPress and Tailwind CSS.

Skills and technologies
- **HTML & CSS**: Good understanding of web development standards and practices for writing clean, semantic HTML and CSS. I have experience in creating responsive websites and using CSS preprocessors such as SCSS.
- **Tailwind CSS**: Experience working with Tailwind CSS to create modern user interfaces using a utility-first approach.
- **JavaScript**: Basic knowledge of JavaScript, including DOM manipulation and working with asynchronous programming. I create dynamic elements and interaction on sites.
- **PHP**: Use PHP for developing and customizing WordPress sites, enabling dynamic content and functionality.
- **WordPress**: Experience in creating custom themes and plugins for WordPress. I customize themes for clients, using PHP and Advanced Custom Fields (ACF) to add dynamic content.
- **Shopify**: Basic knowledge of Shopify, including creating and customizing themes, as well as managing products and dynamic page elements.
- **Hugo**: Basic understanding of static site generation on Hugo, focusing on content management and site structure.
- **React.js**: Studied React.js through the SkillUp course, gaining an understanding of component-based architecture and state management.

Work experience
- Junior Frontend Developer: Worked on creating websites for clients using HTML, CSS, JavaScript, PHP and WordPress, used tools like Figma and Git. Assisted in the creation of custom elements and integration with CMS platforms.
